

# TYCOLOR ON TYVEK® WHITE 210

matt 3261, 95 g/m<sup>2</sup>

TyColor is based on DuPont Tyvek®, a PE spin banner media, with a special waterfast matt coating. It delivers brilliant colour rendering and perfect edge definition. This banner is ideal for applications where resistance to wet conditions is a requirement.

## Advantages

- Unprotected outdoor use for up to 3 months
- Lamination extends outdoor durability
- Tear resistant
- High water-resistance
- Good cost : performance ratio

## General tips

For quality reasons the media should be stored and converted under conditions of 30-65% relative humidity at a temperature of 10-30°C / 50-86°F.

For full color wide-format graphic arts inkjet printing, designed for graphics and presentations with high color densities. Compatible with dye-based and pigment-based ink systems.

## Physical data

Name	Value	Norm
Weight [g/m <sup>2</sup> ]	95	ISO 536
Thickness (paper) [µm]	220	ISO 534
ISO Brightness [%]	138	ISO 2470-1
Opacity [%]	92	ISO 2471
Chromaticity (D65/10°)	L* 99.5 a* 3 b* -9.0	DIN 6174

## Technologies

## Properties

- Water-resistant / Waterfast
