

Dear Mr. Motiwala,
all the latest news for you at a glance.

- **May we introduce? Our new headquarters for Sihl USA**
- **Our new GreenGrafX product range: The next step towards a green future**
- **Revolution of the packaging market - ARTYSIO Pack & Print**
- **Cleaner environment with labels printed on demand**

New headquarters for Sihl USA

We are growing to six locations in the USA with head office in Tampa (Florida)

About six months ago, we set an important milestone on our #Sihljourney by acquiring Dietzgen Corporation®, a leading provider of converting and distribution services for digital print media. So, we have significantly expanded our footprint in the USA to six strategically located sites. This allows us to create an exceptional offering for our customers in terms of quality and service. Sihl USA's new headquarters is in Tampa, Florida.

Environmentally friendly, PVC-free, self-adhesive

Our GreenGrafX products make your advertising applications sustainable

ESG is an important part of our company strategy, and this naturally includes the sustainability of our products. We develop and produce almost all products in our Dueren plant, so they are "Made in Germany". In this way, we guarantee high quality, reduced CO2 emissions and manufacturing with a reduction in environmental pollution and greenhouse gas emissions.

With our GreenGrafX product range, environmentally friendly signage applications are no longer a problem, because all varieties are PVC-free and self-adhesive, so they can be applied very easily.

We set new standards with Pack & Print

Print ARTYSIO stand-up pouches according to your needs

With ARTYSIO Pack & Print we offer you unprecedented flexibility in the packaging market for all small, highly flexible customer orders up to 10,000 pieces. The Pack & Print stand-up pouches are already prefabricated and can be individually printed and filled as required using aqueous inkjet.

Simply order the pre-made pouches and print directly as required. It couldn't be easier or faster! Not only does this significantly shorten the delivery time of the digitally printable stand-up pouches, but you also don't need your own pouch equipment.

Our environmentally friendly solution for coloured tags

With decentralised on-demand printing, labelling and sustainability go hand in hand

Our ENDURO and PICOFILM ranges offer you new solutions for decentralised on-demand printing of tear-resistant loop and hang tags and plant stabbers. Produce the exact quantity you need directly on site. This results in less waste and no stock that increases working capital.

The efficient production in digital printing also contributes to lower CO₂ emissions, as there are no long transport routes, and the goods are available immediately. The advantage for your customers: individual personalisation requests, such as the printing of advertising messages or product information, can be fulfilled at any time.
