

## TICKETTHERM

Thermal paper for  
car park tickets

# TICKETTHERM – constant under all conditions

Car park tickets made of Sihl thermal paper impress not only with excellent printability, but also by the excellent durability of the thermal print – even under extreme environmental conditions.

Furthermore, they offer optimised wet smear resistance. No matter how variable the climatic conditions (heat and humidity), the thermal image remains legible and the paper stays flat.

Excellent printing results with both flexo and offset printing.

## Special benefits:

- > Durable thermal prints in all conditions: Resistant to water, heat, light, alcohol, oil/fat or plasticizers
- > Ultra-white base papers with or without a special coating to improve printability on the reverse
- > High performance due to optimal flatness for trouble-free use in carpark ticket machines
- > SKIDATA approval
- > All thermal papers in the car park ticket range are FSC® certified

## Resistances

		Sort	Weight gsm	Thickness µm	Reverse side coated	Water	Heat	Light	Alcohol	Oil/Fat	Plastici- zers	SKIDATA approval
